BIRTH
CENTER

The CTBC Difference

Central Texas Birth Center adheres to a true midwifery model of care. We view birth as a sacred, spiritual rite of passage which should be treated with the utmost respect.

- We are a low volume birth center. We accept approximately 10 births per month, in order to place an importance on our quality of care rather than quantity of clients.
- Appointments are scheduled for an hour long, to give you ample time to ask questions and discuss concerns.
- We employ 2-3 midwives and you have the ability to choose the midwife you'd like at your birth.
- CTBC focuses on the community aspect of the childbearing years, encouraging our clients to attend classes and pregnancy groups which are held at the birth center.
- 90% of CTBC births are in our luxury birthing tubs, affording both mom and baby the ultimate birthing comfort.
- CTBC clients form long term bonds with not only their midwives, but each other. Our weekly moms group has continued to flourish as new moms join the CTBC family.
